Shift in Construction Worker Vehicle Traffic

In August we shared with you that construction worker vehicle traffic would begin to access Rokeby Site from its main entrance at 804 Rokeby Line. This occurred on Wednesday, September 25.

Please exercise caution and patience as you travel along Rokeby Line, especially during peak construction traffic times on weekdays from:

- 6:00 am – 8:00 am, and
- 3:00 pm – 5:00 pm.

Traffic management plans are continuously monitored to assess whether control measures need to be implemented to enhance safety and reduce risk.

We understand that this may cause inconveniences and we continue to work with our contractors, subcontractors and multiple local agencies to reduce the impact of our construction activities and to maintain safety as our highest priority.

The Rokeby Site main entrance is also being temporarily widened to accommodate oversized equipment deliveries. This work is tentatively scheduled for three weekdays in early October. We anticipate minimal traffic impacts and traffic control is being implemented.

Culvert Widening at Gate #3 off Petrolia Line

As part of the Corunna Cracker Expansion Project, Gate #3 off Petrolia Line is being widened temporarily to accommodate the arrival of the new heaters to Corunna Site. This includes temporary widening of the culvert at the Gate #3 entrance.

This work is tentatively scheduled for a weekend morning in early October. We anticipate minimal traffic impacts and construction signage is being posted.

This newsletter is intended to share information on construction of our new Rokeby Site.

The project involves the construction of a second Advanced SCLAIRTECH™ technology facility (AST2) to be located at the new Rokeby Site, adjacent to our Corunna Site.

With a capacity of approximately one billion pounds of polyethylene per year, the facility will allow us to continue to grow our polyethylene business in high performance applications and will provide greater supply reliability for our customers. Construction is underway with start-up targeted for late 2021.

This project is part of a capital investment of approximately \$2 billion for two new significant projects for our St. Clair Township operations: the new polyethylene facility and the next phase in the expansion of our Corunna Site cracker.

Construction is underway and detailed engineering work continues, with approximately 650 tradespeople currently on-site.
