

NOVA Chemicals manufactures plastics and chemicals that are essential to everyday life. Our employees develop and manufacture materials for customers worldwide who produce consumer, industrial and packaging products. Our current businesses focus on olefins/polyolefins, Performance Styrenics polymers and EPS-based downstream ventures.

NOVA Chemicals is unique among its peers due to its low-cost manufacturing base, its differentiated products and technologies, and its simple, focused business model. NOVA Chemicals works with a commitment to Responsible Care® a global, chemical industry performance initiative that helps member companies continuously improve in the critical areas of health, safety, security, stewardship and environmental protection.

Number of Employees	2700+ worldwide
Annual sales, 2008 (U.S.\$)	Revenue: \$7.3 billion
Chief Executive Officer	Christopher D. Pappas
Products	Olefins/Polyolefins – Ethylene and Polyethylene Performance Styrenic Polymers and products Expandable Polystyrene Chemical and Energy Co-Products
Ventures	INEOS NOVA NOVIDESA Accelerated Building Technologies
Operating Centers	Calgary, Alberta, Canada Pittsburgh, Pennsylvania, U.S.A. Fribourg, Switzerland Shanghai, China
Manufacturing Sites	Canada: Corunna, Moore Township and St.Clair River, Ontario; Joffre, Alberta U.S.A.: Monaca, Pennsylvania; Painesville, Ohio; Channelview, Texas (equity position) South America: Quilicura and El Tepual, Chile
Technology Centers	Calgary, Alberta, Canada Monaca, Pennsylvania, U.S.A.
