

# Greg DeKunder

Greg DeKunder is Vice President, NOVA Circular Solutions, the company's newly formed business to accelerate the development of lower-emission recycled solutions. In this role, he is responsible for leading NOVA's circular economy strategy including the company's entry into the recycling business, which helps customers gain easy access to valuable, in-demand recycled material and the expertise in how to use it effectively.

DeKunder previously served as Vice President of Marketing for NOVA Chemicals' polyethylene business where he was responsible for accelerating customer success through a dedicated focus on their needs and ambitions, while leveraging business opportunities that helped guide the company's strategic growth into new markets while expanding existing target markets.

Before joining NOVA Chemicals in 2018, DeKunder spent more than 25 years at Total S.A., most recently heading Base Chemicals, Americas within their refining and chemicals business.

DeKunder holds a Bachelor of Science in Mechanical Engineering from the University of Texas, and an MBA from the University of Houston. Currently, he sits on the PLASTICS Material Suppliers Council and is the NOVA Chemicals' Limited Partner Advisory Committee member for the closed Loop Circular Plastics Fund.

He lives in Pittsburgh with his wife and three daughters and enjoys hiking, skiing and other outdoor activities.
