

GEISMAR

In operation since 1967, NOVA Chemicals' Geismar Olefins facility in Louisiana has been a critically important U.S. Gulf Coast asset since our ownership acquisition (88.5% NOVA Chemicals and 11.5% SABIC) in 2017.

The facility is located approximately 21 miles south of Baton Rouge and 60 miles west of New Orleans, within the Iberville and Ascension Parishes.

PRODUCTION

Geismar produces approximately **2 billion pounds** of ethylene and **50 million pounds** of polymer grade propylene and coproducts annually.

Our team of **130 people** are responsible for the safe operation of this jointly owned facility and delivery of olefin products by pipeline, barge, and rail.

NOVA Chemicals strives to **be our customers' first and best choice** by reshaping how plastics are designed, made, and recycled.

With a focus on outstanding innovation and customer experience, we develop and manufacture ethylene, polyethylene (PE), recycled polyethylene (rPE), and plastomers for plastic products and packaging.

Our diverse portfolio of PE and rPE resins are used in a wide range of flexible and rigid applications, enabling customers and brands to create monomaterial products that are suitable for circular packaging opportunities.

SAFETY PERFORMANCE

As a proud and founding member of Responsible Care, our daily efforts are grounded in a shared responsibility to advance health, safety, security, and environmental performance. Historically, our Geismar Site has sustained **industry leading safety performance**, with a current run of **over a year without a single recordable injury**.

Additional safety milestones have included:

- The American Chemistry Council selected Geismar's Contractor Health and Safety Audit Program as an excellent Best Practice for Contractor Safety Management
- Four onsite embedded contract companies received the Greater Baton Rouge Industry Alliance's Safety Excellence Awards
- Multiple time finalist and one time winner of the Louisiana Chemical Association (LCA) Serious About Fostering Excellence Award for Best in Louisiana based on 2021 performance.

RESPONSIBLE CARE™
Driving Safety & Sustainability

We operate our manufacturing facilities adhering to Responsible Care principles. All aspects of our operations reflect a safe and caring attitude for our employees, our communities, and the environment.

COMMUNITY ENGAGEMENT

NOVA Chemicals fosters long-term positive relationships with our community by working closely with our neighbours and ensuring our community outreach initiatives allows for ongoing and frequent dialogue.

We have a long history of giving back to the communities where we live and work. We strive to add value and make a positive impact through active service and investing where our communities need it most. We invest in the well-being of our communities by lending a hand to organizations that are dedicated to making a difference and improving the overall quality of life.

Our team is actively engaged with the Capital Area United Way, raising **over \$200,000 annually** on average.

We participate in a number of community organizations, including:

- Iberville and Ascension Community Advisory Panels
- Industrial Mutual Aid Group
- Iberville and Ascension Community Awareness Emergency Response
- LCA and Industry Alliance trade associations
- East Iberville Inc.
- Capital Area United Way
- Greater Baton Rouge Industry Alliance
- River Parishes Community College
- LDEQ Industry Workgroups
- Local Emergency Planning Committee (LEPC) — Ascension and Iberville
