

Alan Schrob

Alan Schrob is the Director of Mechanical Recycling at NOVA Chemicals. His role is to build and operate a mechanical recycling business at scale that delivers a long-term, secure, high-performing, and controllable supply of recycled polyethylene that helps NOVA Chemicals' customers, brand owners, and retailers to meet their sustainability commitments. Schrob joined NOVA Chemicals in 1999 and has held a number of corporate roles including Director of Purchasing, Investor Relations Manager, Manufacturing Excellence Leader, and Director of Business Development. After joining the marketing organization, he was a Market Manager for both the industrial drums and caps & closures, Group Leader for NOVA Chemicals' rigid packaging markets and consumer and industrial films, and finally Market Management Leader before assuming his current role.

Prior to joining NOVA Chemicals, Alan held positions in finance and purchasing at Huntsman Chemical Corporation. Alan holds a Bachelor of Science in Economics from Old Dominion University. A strong plastics industry advocate, Alan is a former chair of the Communications Committee at AMERIPEN. He serves on the Board of Directors for Deep Springs International which promotes clean drinking water in Haiti. He also volunteers with Executive Services Corps to help small start-up non-profits develop and execute their strategies.
