

# Future Rokeby Site

## Equipment Delivery Notification

December 6, 2019

Beginning Sunday, December 8, a slow-moving heavy haul is scheduled to take place beginning at approximately 9:00 pm from the Courtright Supply Dock.

Accompanied by multiple police and utility escorts, spotters and other support, the delivery is three large columns travelling in a convoy, bound for the construction site of NOVA Chemicals' future Rokeby facility in St. Clair Township.

We work with our contractors, subcontractors and multiple local agencies to coordinate all aspects of the delivery as part of our continued efforts to reduce the impact of our construction activities and to maintain safety as our highest priority. Please note that the date, time and duration of the delivery are approximate and can be impacted by weather and other factors.

### Road Closures and Traffic

Community can anticipate staggered road closures, slow-moving traffic and possible delays along the delivery route. The delivery route is:

- From the Courtright Supply Dock, south on St. Clair Parkway to Courtright Line
- East on Courtright Line to Highway 40
- North on Highway 40 to Rokeby Line
- East on Rokeby Line to NOVA Chemicals future Rokeby Site (804 Rokeby Line)

### Power Disruptions in Courtright

We work with Hydro One to coordinate the lifting of power lines along the delivery route. Staggered outages are anticipated to some residents and businesses for approximately 2-3 hours. Hydro One makes every attempt to notify affected customers of planned outages. Customers requiring additional information about this outage in Courtright can call 1-888-664-9376.

We recognize that this is the second of two major deliveries to impact the Courtright community in a short period of time, and we thank you for your patience and understanding. The Courtright Supply Dock is the best-fit location in our area to receive this type of equipment. At this time, we anticipate one more delivery to the dock with similar impacts, targeted for Spring 2020.

This newsletter is intended to share information on construction of NOVA Chemicals' new Rokeby Site.

The project involves the construction of a second Advanced SCLAIRTECH™ technology facility (AST2) to be located at the new Rokeby Site, adjacent to our Corunna Site.

With a capacity of approximately one billion pounds of polyethylene per year, the facility will allow us to continue to grow our polyethylene business in high performance applications and will provide greater supply reliability for our customers. Construction is underway with start-up targeted for late 2021.

This project is part of a capital investment of approximately \$2.2 billion for two new significant projects for our St. Clair Township operations: the new polyethylene facility and the next phase in the expansion of our Corunna Site cracker.

Construction is underway, with approximately 800 skilled tradespeople on site across both projects, with the majority sourced from the local area.

# Future Rokeby Site Information for Community

**continued from front**

## Noise

Community can anticipate some vehicle noise along the delivery route.

We apologize for the disruption and inconveniences the delivery causes our neighbours and community. NOVA Chemicals' values its communities and we thank you for your patience and support during this time of transition.

Information updates for the community are shared via the CAER Industry Update line as required. Please call 1-855-4SARNIA or 1-855-472-7642. The update line is a 24-hour service that features information on industry activity through pre-recorded telephone messages. The update line is available to all Lambton County residents.

Over the past decade NOVA Chemicals has invested nearly \$1.2 billion into our Ontario manufacturing facilities located in St. Clair Township. Construction is currently underway on a second Advanced SCLAIRTECH™ technology facility (AST2) located at the new Rokeby Site as well as an expansion of our Corunna Site cracker, an additional \$2.2 billion investment that will strengthen the area's growth and our long-term viability. There are currently approximately 800 skilled tradespeople on site across both projects, with the majority sourced from the local area. Facility start-up is targeted for late 2021.

For more information about growth and operations at NOVA Chemicals, please visit our web site: [www.novachem.com](http://www.novachem.com).

**Note to Media:** *As a support to you, NOVA Chemicals is capturing photographs and video of this activity and will distribute them to you directly for your use in publication. We encourage you to keep safety top of mind should choose to take your own photographs along the delivery route.*

One of the columns during its journey to St. Clair Township.

## Being a Good Neighbour

Being a good neighbour in our community is an important goal for us at NOVA Chemicals. With construction of our growth projects ramping up, our desire to achieve this goal is stronger than ever.

Our Good Neighbour Program establishes our specific commitments and actions to manage the impact of our construction activities. We and our contractors are all committed to strategies that proactively consider impacts and opportunities for stakeholders and build positive community relations.

Please visit our website for more information.

**Responsible Care®**  
Our commitment to sustainability.

We are committed to Responsible Care and sustainability in our daily operations as well as our future growth.

As part of this commitment, community outreach is important to us. We make concerted efforts to understand and respond to concerns and seek input about our plans and operations through public consultation and communication.

**We value your input and suggestions. Please contact us:**
