Construction Newsletter

Issue #7 February 2019

Paving The Way for 2019

Being a good neighbour in our community is an important goal for us at NOVA Chemicals. With construction of our growth projects ramping up, our desire to achieve this goal is stronger than ever. Heading into 2019, we remain steadfastly committed to our Good Neighbour Program (see reverse).

Our construction workforce continues to grow, with approximately 240 project personnel and tradespeople on site. Construction traffic and deliveries to site continue to enter from Rokeby Line and exit to Petrolia Line via Gate 3. Project personnel are currently entering and exiting from Gate 3.

Gravel deliveries are enabling the completion of on-site parking lots and roadways. Installation of temporary construction lighting for those areas is also in progress. These lights operate on a timer and are controlled in order to manage offsite impact.

Piling continues and cement trucks are arriving daily to progress work on the foundations. Piling is anticipated to continue into the Fall. As construction progresses project support activities may take place over weekend hours.

This newsletter is intended to share information on construction of our new Rokeby Site.

The project involves the construction of a second Advanced SCLAIRTECH™ technology facility (AST2) to be located at the new Rokeby Site, adjacent to our Corunna Site.

With a capacity of approximately one billion pounds of polyethylene per year, the facility will allow us to continue to grow our polyethylene business in high performance applications and will provide greater supply reliability for our customers. Construction is underway with start-up targeted for late 2021.

This project is part of a capital investment of approximately \$2 billion for two new significant projects for our St. Clair Township operations: the new polyethylene facility and the next phase in the expansion of our Corunna Site cracker.

Site preparations are underway and detailed engineering work continues, with approximately 240 local tradespeople currently on-site.

Being a Good Neighbour

Our Good Neighbour Program establishes our specific commitments and actions to manage the impact of our construction activities. We and our contractors are all committed to strategies that proactively consider impacts and opportunities for stakeholders and build positive community relations.

We are committed to sharing information related to project impacts, opportunities, news and milestones in a timely way.

We are committed to contributing to the local economy.

We are committed to mitigating our impact on natural resources.

We are committed to mitigating construction noise.

We are committed to mitigating our impact on area roads.

Visit our website to learn more about our Good Neighbour program and areas of key focus.

New, Updated Website for Construction News

Our recently updated website is your one-stop shop for timely news and information related to our growth projects.

Responsible Care[®]
Our commitment to sustainability.

We are committed to Responsible Care and sustainability in our daily operations as well as our future growth.

As part of this commitment, community outreach is important to us. We make concerted efforts to understand and respond to concerns and seek input about our plans and operations through public consultation and communication.

We value your input and suggestions. Please contact us:
