

Future Rokeby Site

Construction Newsletter

Issue #14 November 2019

Making Growth Happen

At this point in the projects, equipment is being delivered to site every week from local fabrication shops and others. The community should anticipate slow-moving traffic and possible delays on area roads. We encourage you to buckle up, drive safely, and keep your eyes and mind on the road.

We work with our contractors, subcontractors and multiple local agencies to coordinate all aspects of each delivery as part of our continued efforts to reduce the impact of our construction activities and to maintain safety as our highest priority. Please note that the date, time and duration of the delivery are approximate and can be impacted by weather and other factors.

Overnight Equipment Delivery

Beginning Sunday, December 8, a slow-moving heavy haul is scheduled to take place beginning at approximately 9:00 pm.

Accompanied by multiple police and utility escorts, spotters and other support, the delivery is three large columns travelling in a convoy, bound for the construction site of NOVA Chemicals' future Rokeby facility in St. Clair Township.

The community should anticipate staggered road closures, slow-moving traffic and possible delays along the delivery route. The delivery route is:

- From the Courtright Supply Dock, south on St. Clair Parkway to Courtright Line
- East on Courtright Line to Highway 40
- North on Highway 40 to Rokeby Line
- East on Rokeby Line to NOVA Chemicals future Rokeby Site (804 Rokeby Line)

The convoy is anticipated to move at 4 to 5 km per hour.

The community should anticipate some vehicle noise along the delivery route.

We apologize for any disruption or inconvenience that the delivery causes our neighbours and community. NOVA Chemicals values our communities and we thank you for your patience and support during this time of transition.

This newsletter is intended to share information on construction of our new Rokeby Site.

The project involves the construction of a second Advanced SCLAIRTECH™ technology facility (AST2) to be located at the new Rokeby Site, adjacent to our Corunna Site.

With a capacity of approximately one billion pounds of polyethylene per year, the facility will allow us to continue to grow our polyethylene business in high performance applications and will provide greater supply reliability for our customers. Construction is underway with start-up targeted for late 2021.

This project is part of a capital investment of approximately \$2 billion for two new significant projects for our St. Clair Township operations: the new polyethylene facility and the next phase in the expansion of our Corunna Site cracker.

Construction is underway and detailed engineering work continues, with approximately 650 tradespeople currently on-site.

Making Growth Happen cont.

Overnight Equipment Delivery cont.

Information updates for this equipment delivery will be shared with the community via the CAER Industry Update line as required. Please call 1-855-4SARNIA or 1-855-472-7642. The update line is a 24-hour service that features information on industry activity through pre-recorded telephone messages. The update line is available to all Lambton County residents.

Weekly Piperack Deliveries

From now through the end of March 2020, we anticipate twice weekly deliveries of piperack modules to Rokeby Site. Travelling at a speed of 1 km per hour, these deliveries will typically occur on Monday and Thursday mornings starting at 9:00 a.m. Accompanied by a police escort and other support, the community should anticipate staggered road closures along the route. The delivery route is:

- North on Polymoore Drive to Hill St/Petrolia Line
- East on Hill St/Petrolia Line to Corunna Site Gate 3

The first piperack module arriving to Rokeby Site.

Being a Good Neighbour

Being a good neighbour in our community is an important goal for us at NOVA Chemicals. With construction of our growth projects ramping up, our desire to achieve this goal is stronger than ever.

Our Good Neighbour Program establishes our specific commitments and actions to manage the impact of our construction activities. We and our contractors are all committed to strategies that proactively consider impacts and opportunities for stakeholders and build positive community relations.

Please visit our website for more information.

Responsible Care®
Our commitment to sustainability.

We are committed to Responsible Care and sustainability in our daily operations as well as our future growth.

As part of this commitment, community outreach is important to us. We make concerted efforts to understand and respond to concerns and seek input about our plans and operations through public consultation and communication.

We value your input and suggestions. Please contact us:
