Petrolia Line Temporary Lane Closure

On Thursday, February 27, a delivery is scheduled to take place from a local fabricator.

Accompanied by police and utility escorts, spotters and other support, the delivery is two large dryers travelling in a convoy bound for Corunna Site in support of the Corunna Cracker Expansion project.

The community can expect a three-hour single lane closure on Petrolia Line starting at 9:00 am. Two-way traffic will be managed by traffic control personnel on the east-bound lane. The community should also anticipate slow-moving traffic and possible delays along the delivery route, which is shown below:

Information updates for these equipment deliveries will be shared with the community via the CAER Industry Update line as required. Please call 1-855-4SARNIA or 1-855-472-7642. The update line is a 24-hour service that features information on industry activity through pre-recorded telephone messages. The update line is available to all Lambton County residents.

This newsletter is intended to share information on construction of our new Rokeby Site.

The project involves the construction of a second Advanced SCLAIRTECH™ technology facility (AST2) to be located at the new Rokeby Site, adjacent to our Corunna Site.

With a capacity of approximately one billion pounds of polyethylene per year, the facility will allow us to continue to grow our polyethylene business in high performance applications and will provide greater supply reliability for our customers. Construction is underway with start-up targeted for late 2021.

This project is part of a capital investment of approximately \$2 billion for two new significant projects for our St. Clair Township operations: the new polyethylene facility and the next phase in the expansion of our Corunna Site cracker.

Construction is underway with approximately 600 tradespeople currently on-site.
